Expert Service Team in Wilson

In today's competitive, cost conscious world of tobacco farming, high efficiency is the only way to increase your profits. That's why more producers around the world turn to World Tobacco, Inc. They know they can rely on our tobacco Kilns (Barns) "Energy" to save on labor costs, reduce energy consumption and cure tobacco to world-class standards.

Our Kilns (Barns) "Energy" are built to the highest standards using only the finest quality materials with steel construction and tongue and groove, Coldmatic panels designed to withstand thermal rippling. Our Kilns (Barns) "Energy" deliver consistent, positive air flow along with desired humidities and temperatures.

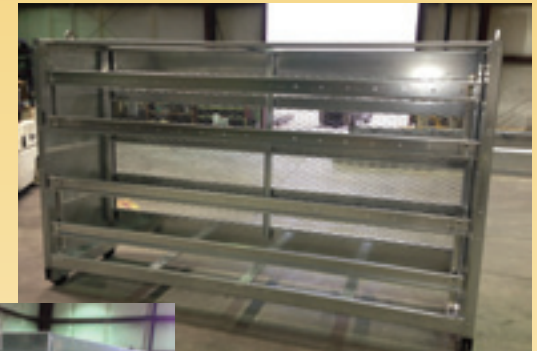

So, even in humid or difficult conditions, and regardless of stock positions, your tobacco quality is maximized every time.

World Tobacco, Inc. boxes are the ideal size for curing consistency.

"Best barns ever!"
- Danny Kornegay Farm

The Evans MacTavish Agrcraft heat exchanger is the most widely used heat exchanger on the bulk tobacco barn market. It has been proven to be the most efficient. It is designed to fit all the popular barns. The frame is tube steel with insulated panels.

New World Tobacco
